

Design as epistemic engineering

Valerii Shevchenko, MOME IxD 1/2

November 2023

0.1 Introduction

0.2 A brief note on niche construction and epistemic engineering

- 4-dimensional evolution
- (Sterelny, 2003)
 - downstream niche construction
 - epistemic engineering → tomasello ratchet → tools

0.3 Design as epistemic engineering

- Tools use in Pleistocene as proto-design
- Decoupling of design from evolutionary pressure
- Would coupling it back solve the problems and if yes, how?

0.4 Conclusion
